RESIZING FONTS - PROJECTOR LAYOUT

The sizes below work well for 1280 x 1024 screen resolution. If you do not have this resolution available (Control Panel>Display>Settings), then choose the closest. Resolution over 1280 x ### do not display well on a projected screen as the fonts. A lower screen resolution, like 1024 x 768, will also make the fonts larger. Once you get a layout that works, SAVE the layout with a unique name, preferably identifying the resolution and that it is for the projector (1280x1024Projector or 1024x768Projector) or you will have to do it all over again.

Preferences>Program Options:

Data Entry	15 18	Minimum memo font size Maximum memo font size [Check Advanced] [Uncheck Use Buttons]	Affects memo field only, and the expanded memo window
Lists	14 14	Minimum font size Maximum font size	Affects all lists which include: ° Details Window 　　(Person View only) ° Children Window ° Sibling Window ° Associates Window ° Flag Window ° Master Source List ° Master Repository List ° Master Place List ° Master Event List ° Master Tag Type List ° Master Style List ° Source Type List ° Source Elements List And, in the Tag Entry Window, affects: ° Witness list ° Citation List
Project Explorer	12	Font Size	Affects: ° Project Explorer ° Expanded Pick List ° Focus Group ° Preference List
Other	14 14 14	• Family View font size • Tree View font size • Prompt/warnings font size [Check TMG5/6 win resizing to make fonts larger (max memo size in Data Entry) when you maximize a window]	• Affects Family View Window • Affects Tree View Window • Affects font size for Prompt and Warnings
